

Mini-Camp: Light+Shadow Lab

Shadows, Light & Improv!

We will play with light and shadow through puppetry, as well as act out traditional stories using our own shadow puppets.

We will spend time **playing improv games, making hand shadow animals, and exploring the science of shadows and light.** We will make our own hand and shadow puppets, and play with them using favorite stories as our inspiration.

Key vocabulary in the **target language** depends on your child's language level and may/will include sequencing language, light and shadow vocabulary, transparency and opacity, cause and effect, steps in a process, etc.

Clothing: Please check the weather and dress your child appropriately for outdoor play. We will be running and playing games outdoors, and walking to and from the park. Depending on your child's needs, you may want to provide a change of clothes.

What to bring

1. Please provide the below items in a backpack or bag your child can carry for a short distance (extra clothing will be left in the classroom).
2. Please provide a bag lunch (we provide snacks). Lunches should be **nut-free** and not require refrigeration or reheating.
3. Refillable water bottle
