

La couleur d'automne éclatante • El vibrante color del otoño

Oct. 5: Smashing Fall Color!

Smash! écraser! rip! gratter! scrape! broyer! pulverize! smear! raspar! grind! moler! squish! aplastar! déchirer! ... we'll do all these things in service of finding and making color. We'll destroy some leaves and ferns and other natural materials that we gather ourselves to make art and get to the essence of color.

In tamer words: Campers engage in science and art activities that teach about natural pigmentation, chlorophyll, and how/why leaves change color in the fall. And they make some messy, and not-so-messy, art!

We'll **collect leaves and stalks**, “**paint**” **with green leaves**, and **make prints** with paint and pastels as well as clay. We'll of course **play outdoor games and do other physical activities** to get your child moving and breathing fresh air!

Key vocabulary in **French** or **Spanish** includes color, pigment, scientific process, transformation, process language, sequencing language, and language they will use while making art projects. You will receive a vocabulary and fact sheet with images and concepts they learned.

Rain plan: Rain is forecast from the remnants of Hurricane Ian. We will head to the Natural History Museum (or other museum TBA) if it's pouring outside, but we will also be walking some in the rain, so ↴

Please check the weather and be sure your child is dressed appropriately for outdoor play, running, and walking! If it rains, we may still be outside for a while, so please be sure to send your child with a raincoat and shoes that can get wet. We will provide snacks, **you provide a bag lunch.**
